TREMCO®

metal

Restoration Systems by Tremco offers a variety of waterproofing and rustproofing coating systems to restore and extend the life of your metal roof system.

- ELIMINATES LEAKS
- REDUCES ENERGY COSTS
- STOPS RUST AND CORROSION
- RESTORES YOUR ROOF TO ITS ORIGINAL BEAUTY

ROOF PROBLEMS

OBSERVATIONS

Before a product or system can be selected or even recommended, a complete of your roof system needs to be conducted to determine your roof's condition and problems. Restoration Systems by Tremco offers no-obligation roof inspections necessary to provide you with the most beneficial solution to your particular roofing need.

Your metal roof observation will cover two main areas — the surface condition of the roof panels and the details such as seams, fasteners, skylights and roof top equipment, since these areas are where most leaks begin.

Solutions

Restoration Systems by Tremco offers several options for your

metal roof system, from our signature aluminum roof coating,

Alumanation 301, perfect for protection against water infiltration,

rust and deterioration of metal panels to our acrylic TREMLite that

fits when a watertight white or colored roof is desired. Whichever

product you choose for your building's roofing needs, Tremco, an

ISO 9001: 2008 certified company, provides the strictest quality

controls to ensure product consistency and performance.

STRESS-FREE APPLICATION

Throughout Australia, Tremco works with a select group of contractors who are highly trained and experienced in installing all products. Your Tremco representative can provide you with names of contractors in your area, taking the guesswork out of selecting a quality contractor.

LONG-TERM PERFORMANCE

Restoration Systems by Tremco offers a variety of warranties to ensure the performance of your metal roof coating system. For all material warranted coating projects, job site observations are provided to ensure that your system will provide you with years of quality service life.

TREMLite Acrylic Roof Coating System

TREMLite white acrylic roof coating options provide reflectivity and waterproofing in spray or roller applications. ENERGY STAR® rated and VOC compliant, material warranties are available for TREMLite Acrylic Roof Coatings.

TREMLite Hy-Build

- Fibrated formula bridges small gaps
- Excellent sag resistance on sloped substrates
- One-coat application reduces installation costs
- 40-year performance history
- Reflective surface reduces energy use

TREMLite 6083

- Formulated to meet and/or exceed ASTM D-6083
- Excellent resistance to weathering
- High elongation; low temperature flexibility
- Excellent aged performance values

TREMLite Acrylic Color Options

Low VOC, quick drying, single component, water-based acrylic coatings provide industrial performance for exterior metal surfaces.

- Low odor, environmentally friendly

ALUMANATION 301 Aluminum Roof Coating System

A fibrated, aluminum coating provides waterproofing and rustproofing in a one-coat application.

- Most economical solution
- Provides rustproofing
- One-coat application
- No primer is needed
- 15% metallic content for high reflectivity
- Material warranties available

SEAM SEALER

By simply adding Seam Sealer, an elastomeric seam treatment, to metal seams, fasteners and roof penetrations prior to coating it with either TREMLite or Alumanation 301, your roof will be waterproof. This seam treatment provides the necessary reinforcement to your metal roof system to allow for the expanding and contracting inherent in metal roofs. Coupled with a monolithic layer of TREMLite or Alumanation 301, your roof will be watertight for years to come.

We provide products and services for roof and wall restoration under the brand names of ALPHAGUARD®, ALUMINATION®, 301, ECOLASTIC®, GEOGARD®, ICE, ROCK-IT®, SOLARGARD®, and TREMLASTIC®. Our products offer long performance and energy savings to ensure that customers have the right solution to meet their specific restoration needs. Tremco has been a leader in the roof coating and restoration industry since 1928.

Republic Restoration Systems by Tremco offers solutions for:

- Built-Up Roofs/Modified Bitumen Roofs
- Weathered Single Ply Roofs
- Metal Roofs
- Foam Roofs
- Concrete Roofs
- Walls

REPUBLIC RESTORATION SYSTEMS BY TREMCO SUPPORT SUSTAINABILITY

Restoring roofs has been at the forefront of our philosophy for over 80 years. This positions our reflective roof surfaces to help today's customers meet their sustainability goals by extending the life cycles of buildings worldwide while helping lower energy costs.

Republic Restoration Systems by Tremco helps meet sustainability goals because:

- They prolong the service life of structures for years
- Coatings are cost-effective over a second roofing layer, complying with building codes and postponing replacement for years
- There's no tear off, which eliminates landfill issues and fees and does not disrupt building occupants
- Reflectivity reduces energy consumption, the strain on HVAC systems, and a building's carbon footprint
- The Urban Heat Island Index is lowered, benefitting everyone
